- Wed 5/15 **Hermantown, MN**
- Wed 5/22 **Hayward, WI**

FREE class to train and recruit volunteer weather spotters across the Northland

Spotters learn about **how thunderstorms can produce tornadoes, why a storm rotates, ingredients for flash flooding** and more

Understand NWS Products and Services, like the difference between a **Watch** and a **Warning**

Your **on-the-ground storm reports are important for accurate warnings** - we can't do our jobs without your reports!

Learn storm spotting from the meteorologists who issue the warnings for YOUR community!

Full Schedule Available at
[weather.gov/dlh/skywarn](https://www.weather.gov/dlh/skywarn)

Already a Spotter?

We ask that spotters attend a class every **3-4 years** to remain proficient
